## PURPOSE AND INTENDED AUDIENCE

The goal of this CME activity is to update and educate ophthalmologists on new diagnoses and treatments of eye disease and to provide instruction on how to incorporate these treatments into daily clinical practice. It includes descriptions and updates on new vision research that have clinical implications. The target audience includes comprehensive and subspecialist ophthalmologists on the front lines of patient care, whether in private practice or in academic medicine.

## EDUCATIONAL OBJECTIVES

Upon completion of this program, participant learners should be able to:

- Understand diagnosis, pathogenesis, and treatment of blepharospasm
- Describe best imaging studies for neuro-ophthalmic findings as well as the distinctive clinical and radiographic findings
- Identify the three main changes that were required to facilitate the goal of being a successful academic department of ophthalmology
- Identify the key components of ophthalmic education that creates the best ophthalmologists
- Determine the best ways to secure intraocular lenses via optic capture
- Determine if a whole eye transplant is possible and what it would require
- Identify the future direction of a variety of glaucoma therapies
- Understanding the biomechanics of the cornea
